

3rd Grade Animal Adaptations

Driving Question

How can we, as scientists, create a new species that will thrive in a specific biome?

Content

This project will cover a variety of 3rd grade standards: Next Generation Science Standards as the students learn how and why some animals survive in certain environments (NGSS LS4.C), research and build to present knowledge (W 3.7, 3.8), write an expository text (W 3.2), and speaking and listening skills (SL 3.1-3.5).

Major Products

Students will publish an article of their animal creation for our class magazine.

Public Presentation

Copies of our class magazine will be available to other classrooms.
