

# 4TH GRADE'S ROAD TRIP ACROSS CALIFORNIA

**DRIVING QUESTION:** How can we as travel agents use our knowledge of California's unique landmarks and geographical features to create the ultimate road trip across California?

**CONTENT:** This project will cover a variety of 4th grade standards: math standards as the students work on the financial management aspect of the trip, knowledge of California's geography, reading comprehension, persuasive writing and presentation skills.

**MAJOR PRODUCTS:** Each group will create a Google Slides presentation and a brochure to advertise their planned road trip.

**MAKING IT PUBLIC:** The group will present their final products to the class and their clients. We will also photocopy brochures and take them to local travel agencies to have available for their customers.
